

Titan Trailers

The "Titan" trailer offers a high quality trailer at an unbelievably low price. We started developing this line over 2 years ago and we have continuously adapted it and altered it in accordance with British legislation and customer requirements. Built from heavy duty galvanised steel and with moulded mudguard's making this a robust and aesthetically pleasing product.

The medium trailer (7032) has a tipping mechanism and comes complete with a locking chain in order to lock it at various heights. All products are designed to maximise convenience by having all rear features positioned so that the product can easily be stored vertically. Ideal for storage in a confined space when not in use.

Titan Trailers Accessories

Side Extension Kit

Our side extensions have a unique 2 piece hinge design that allows the panels to be quickly attached and detached. Once attached they fold together and are secured with quick release clamps. This also allows for one side to be dropped to aid access.

Small for the 7030 trailer 7036
Medium for the 7032 trailer 7037
