

## DC AirCube 500

**The DC AirCube 500 has been developed for ease of use and durability.**

The fan unit is a radial blower, especially designed to build up high pressure across its entire flow range. This means that the unit generates a large amount of airflow during the entire lifetime of the filter. An exhaust hose can be used to create negative pressure in a sealed room. The fan has two speed settings, which means that the unit can be run economically, for example during the night.

### Specification

H x W x L	38x34x50 cm
Weight	13 kg
Inlet/outlet diameter	38x34 cm / $\phi$ 12.5 cm
Power consumption	
230 V	210 W
115 V	195 W
Flow at open inlet, max*	600 m <sup>3</sup> /h
230 V	470 m <sup>3</sup> /h
Pre-filter area **	0.18 m <sup>2</sup>
HEPA filter area	4.56 m <sup>2</sup>
Filter class	H13
Sound level	45-65 db (A)
