

SUNBELT
RENTALS®

6M ELECTRIC TELEHANDLER

Our new fully electric Telehandlers from Faresin can handle loads of up to 2,600kg, with 6m lift height and a 3m forward reach.

With zero noise and zero emissions and low running costs they offer the ultimate eco solution for noise and emission sensitive sites; making them ideal for night work, events and enclosed spaces.

They are easy to charge via a standard commando plug, with charge time depending on your available power supply. A standard 110v supply will charge the telehandler over night, while 230v and 400v power supplies can rapidly increase charge time to 3.5 hours for a full charge. The standard 300Ah battery gives 3 hours continuous use or 6 hours standard (intermittent) use.

**ZERO
EMISSIONS**

IDEAL FOR ECO-SENSITIVE SITES

NIGHT WORK, RESIDENTIAL AREAS, INDOOR/ENCLOSED SPACES AND EVENTS

**LOW
NOISE**
